Wireless Freedom

UX5000

Crystal-Clear Sound, Beautifully Balanced.
A True Wireless Masterpiece.

Immerse yourself in an expansive three-dimensional soundstage where every note resonates with life and emotion. The UX5000 redefines wireless audio, combining the acoustic craftsmanship of final's flagship models with cutting-edge digital engineering.

Flagship Sound Heritage

Developed with insights from the flagship A10000 earphones, the UX5000 embodies final's relentless pursuit of acoustic perfection. Through precise adjustments to the internal sound cavity, it achieves crystal-clear highs, rich bass, and remarkable depth—faithfully reproducing the true essence of every genre. From the delicate resonance of classical music to the raw power of rock and the intimate energy of live jazz, the UX5000 delivers high-resolution sound that rivals premium wired headphones.

The Fusion of Acoustic and Digital Excellence

Equipped with a 40mm large-diameter dynamic driver, the UX5000 is meticulously tuned with refined acoustic damping and carefully selected filters to maximize performance. At its core is Qualcomm's QCC3095 SoC, chosen purely for its superior sound quality. Together with support for the LDAC™ high-resolution codec, it achieves sound reproduction rich in detail and realism.

Hybrid Noise Cancelling, Comfort Intact

The UX5000 features a Hybrid Noise Cancelling system, combining feedforward and feedback methods for precise suppression of ambient sound—without compromising audio quality. Its proprietary algorithm ensures music remains natural and engaging whether you're at home, in the office, or on the move. An Ambient Mode also lets in external sounds when needed, ensuring awareness and convenience in daily life.

Wired Mode for Studio-Grade Performance

Connect the supplied 3.5 mm cable to use the UX5000 as wired headphones with ultra-low latency — perfect for mixing, editing, or gaming. Unlike most wireless models, it preserves its DSP-optimized sound signature even in wired mode, ensuring consistent fidelity across all uses.

Designed for Everyday Elegance

Crafted as a timeless tool, the UX5000 is built to age beautifully—like a camera that grows more personal with time. Its textured matte finish resists scratches, dirt, and hydrolysis, preserving a refined, premium feel through years of use.

Built to Last

- Replaceable Battery: The UX5000 allows battery replacement, ensuring years of continued use.
- Comfort-Engineered Fit: Low-rebound ear pads balance insulation and comfort, while a high-rebound headband evenly distributes pressure.
- User-Replaceable Parts: Both ear pads and headband can be detached magnetically—no tools required.

Smart Control with the final UX5000 App

Customize your listening experience via the dedicated app, featuring:

- 10-band equalizer
- Noise control mode switching (Noise Cancelling / Ambient / Off)
- Multi-point connectivity support

Perfect Fit, Every Time

The Multi-Fit Housing Mechanism adapts flexibly to any head shape, ensuring excellent seal, reduced sound leakage, and deep, powerful bass. Intuitive control buttons and an included semi-hard carrying case add to the seamless user experience.

Specifications

Bluetooth® Version: 5.4

Frequency Response: 20Hz–40kHz

Supported Codecs: SBC, AAC, aptX™, aptX™ Adaptive, LDAC™

Profiles: A2DP, AVRCP, HSP/HFP

Playback Time: Up to 45 hrs (ANC ON) / 65 hrs (ANC OFF)

Charging Time: Approx. 2 hrs

Battery Capacity: 700mAh

Weight: 310g

Accessories: 3.5mm cable, semi-hard carrying case
